

# Installation Guide for Tereo Offsite Backup Software

Provided by Higher Ground Technologies

Copyright 6-9-2010

## System Requirements

- Operating System : 2000 / XP / 2003 / Vista / 7 / 2008+
- Memory : 128 Mbytes
- Disk Space : 100 Mbytes
- Network Protocol : TCP/IP (Http/Https)
- Please make sure you have logged onto Windows using an account with admin privileges

## Installing the software

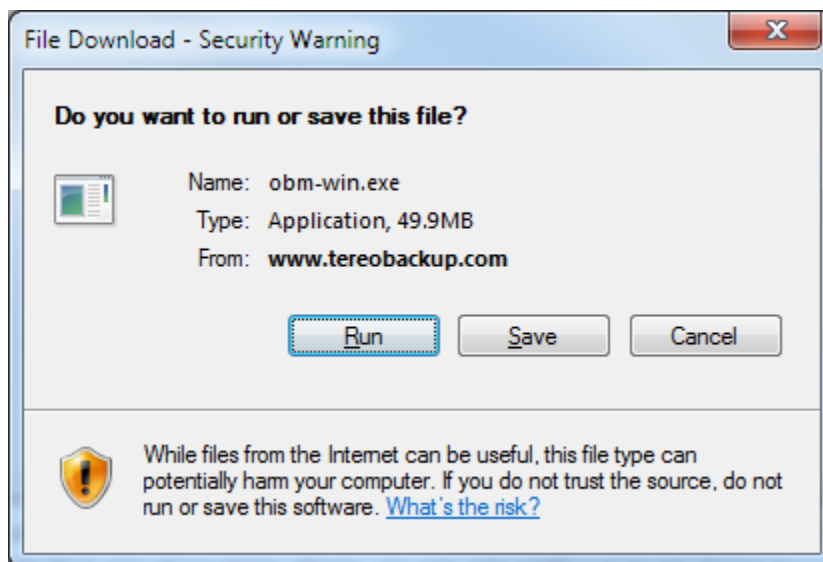

Open your favorite web browser, and connect to <http://www.highergroundtech.com>

Click on Services in the Menu Bar

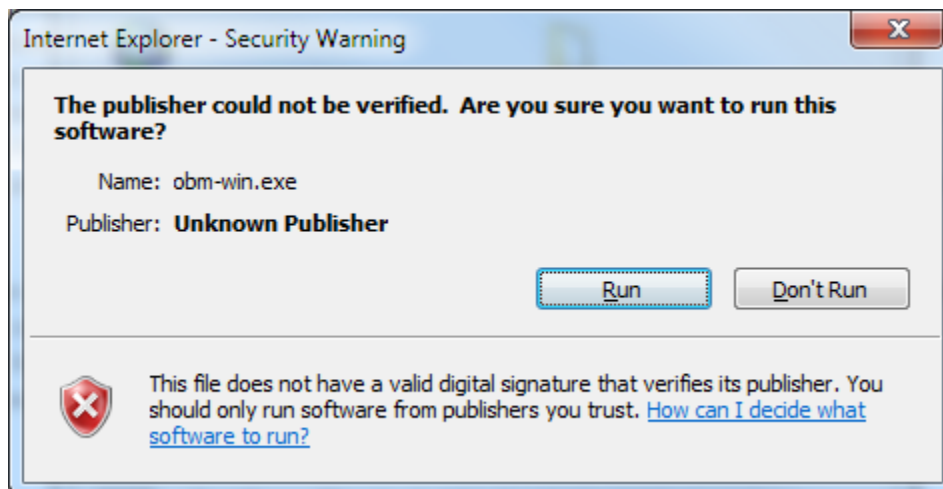

Click on Tereo Backup

Click the Download button at the bottom of the page

When the File Download – Security Warning screen pops up, select Run. The file download will start.

If you get a security warning, select Run

If you get a UAC prompt (Do you want to allow the following program to make changes to your computer?) Select Yes.

On the “Welcome to the TereoOBM Setup Wizard” screen, click Next

Read and accept the agreement, and click Next

Choose the installation path. If you are not sure where to install it, leave the default installation path selected and click Next

Select “Anyone who uses this computer” and click Next

Click Install

When the install is finished, click Finish. TereoOBM will launch automatically.

### **Connecting to the software for the first time**

On the first screen, click “Already a User” at the bottom of the page

Enter the Login Name and Password provided to you

Click “Save Password” if desired, and click OK
